

METAL DEFENDER

AFFORDABLE PROFESSIONAL SECURITY

PRODUCT DESCRIPTION

Six interlaced detection regions of the same high with the body and combining. LED alarm light on column, displaying the area of metal detected accurately.

Infrared emission and the receiver to prevent detection blind spot. 100% Ferrous & non-ferrous metal detect.

Uses microprocessor digital control technology, anti-interference ability, Each region has 100 adjustable sensitivity, in accordance with the requirements in the 0-99 arbitrary regulation, and gets rid of the interference of belt, zippers and other objects.

Product Features and Details

Detection zones

6 Pinpoint Zones to precisely identify multiple target locations from head to toe and pinpoint the location of metal object on six LED bar graphs on the eye level frames.

Coil design Advanced

Broadband Detection Technology provides superior target analysis, ferrous and non-ferrous weapons detection, discrimination and higher patron throughput.

**Alarm
indication**

High visible LCD

Display, alarm lights, connections and electronics are integrated into a single lockable overhead compartment which eliminates exposure of wires and external control box.

**Easy
Assembly**

It is easily assembled

with only 3 (2 sides, 1 top) pieces and 8 Nuts and Bolts

Simple to follow instructions.

**Multiple
Scanning**

6 detecting zones walk

through metal detector uses multi-dimensional scanning which ensures maximum throughput and uniform screening with a minimum of false alarms. Multiple coil circuitry with dual alarm lights inform operators on which side of the detector the target is located. With "hot spots" eliminated, the unit's detection field is uniform throughout the archway and false alarms are significantly minimized.

**Microprocessor
Controlled**

State of the art

microprocessors ensure sensitivity and flexibility of programming with a maximum of 100 distinct sensitivity levels in each program.
