

#### Sport-S9 Bluetooth Connection Instructions:

1. Charge your new Sport-S9.
2. Access your Bluetooth menu in the desired device.
3. Make sure S9 is powered off. Power off the S9 headset using primary function key. Device default is powered off and is indicated by no lights blinking on the inside of the device.
4. Press and hold primary function button for 5-10 seconds or until light alternates/flashes between red and blue.
5. With Apple devices, turn on Bluetooth function. For Android Devices, push "SCAN" for Bluetooth option.
6. S9 device should show as **SPORT-S9** device.
7. Select **SPORT-S9** and continue to connect to your desired device.

#### Standby Mode & Powering Off:

1. Sport-S9 will automatically enter Standby Mode after successfully pairing your device. Standby is indicated by a blue light flashing quickly 3 times every 4 seconds.
2. In order to power off while in standby, press and hold primary function key for 4 seconds. Power off status is indicated by no lights.

#### Phone Call Options:

1. Simply press the Primary function key once to answer any incoming calls.
2. To reject an incoming call, press and hold the primary function key for 3 seconds.
3. To hang up, press the primary function key once while in a call.

#### Additional Functions:

**POWER OFF:** Press primary function key for 4 seconds until light flashes 3 times

**NOTE:** All devices automatically pair. Password is needed to connect. Default is set at 0000
